1) Graduate Trainee (Apprentice), Data Operations

Reporting To:

Director, Global Fund Services

Shift:

EMEA (1:30 pm - 10:30 pm IST) (India)

Job Description:

Apprenticeship is a 12-month program that will provide a comprehensive learning experience, blending theoretical knowledge with on-the-job training. Over the 12-month period, apprentices at Russell Investments will gain valuable exposure to industry while developing essential soft skills and acclimating to a professional corporate environment.

Eligibility

- Should not be self-employed
- Should not be enrolled under other government-funded programs
- Should not be practicing professionally at the time of application
- Should not be registered on EPF/ ESIC Portal
- Should not have completed their education from a foreign university

Apprentices who enroll should have their Aadhaar seeded with their personal mobile number and personal email address. This is a mandate.

Job Overview

As an Apprentice – Data Operations, you will support the Data Operations team in managing, validating, and maintaining critical financial and reference data used across business operations. You will work closely with internal teams, external data providers, and technology partners to ensure accurate, timely, and reliable delivery of data.

The role involves supporting daily operational activities, monitoring data feeds, performing data quality checks, resolving data issues, maintaining documentation, and contributing to process improvement initiatives. The ideal candidate will have strong analytical skills, attention to detail, and an interest in financial markets, data management, and operational processes.

Key Responsibilities

- Support day-to-day data operations activities, including data collection, validation, reconciliation, and distribution.
- Manage and monitor inbound and outbound data feeds from internal systems and external data providers.
- Perform data quality checks to identify inconsistencies, missing information, and data integrity issues.
- Support the maintenance of reference data including security, product, index, fund, and account-level information.
- Assist with investigation and resolution of data exceptions and operational issues within defined timelines.
- Execute data research and analysis to support business requirements and operational controls.
- Maintain accurate documentation of processes, workflows, controls, and operational procedures.
- Support reporting activities by preparing, validating, and delivering operational data reports.
- Collaborate with technology teams and stakeholders to support system enhancements, data migrations, and process improvements.
- Assist in identifying opportunities to improve efficiency, automation, and data quality.
- Ensure compliance with data governance standards and maintain confidentiality of sensitive information.

Required Skills & Qualifications

- Bachelor's degree in Finance, Business, Information Technology, Data Analytics, or a related field.
- Understanding of financial markets, securities, asset classes, and investment data is preferred.
- Strong analytical and problem-solving skills with high attention to detail.

- Ability to manage multiple priorities and work effectively in a deadline-driven environment.
- Good understanding of databases, data structures, flat files, and data processing concepts.
- Working knowledge of SQL for querying and analyzing data.
- Advanced proficiency in Microsoft Excel, including data analysis functions.
- Basic understanding of ETL processes and data workflows.
- Strong written and verbal communication skills.
- Ability to work collaboratively with cross-functional teams.

Preferred Skills

- Experience or exposure to financial data platforms such as Bloomberg, Markit EDM, RIMES, Morningstar, or similar systems.
- Knowledge of Python, VBA, or other scripting languages for data analysis and automation.
- Experience with data management, reporting, reconciliation, or operational support activities.
- Familiarity with investment management or asset management processes.

Core Competencies

- Data accuracy and attention to detail
- Ownership and accountability
- Problem-solving mindset
- Strong organizational skills
- Customer and stakeholder focus
- Adaptability and willingness to learn
- Effective communication and collaboration
- Commitment to confidentiality, integrity, and professional standards

**Role Outcome**

The Apprentice – Data Operations will help ensure the accuracy, completeness, and timely delivery of financial and operational data while developing expertise in data management processes, financial markets, and enterprise data solutions.

2) Graduate Trainee (Apprentice), Global Technology

Reporting To:

Director, Head of Sales & Marketing Tech

Shift:

EMEA (1:30 pm - 10:30 pm IST) (India)

Job Description:

Apprenticeship is a 12-month program that will provide a comprehensive learning experience, blending theoretical knowledge with on-the-job training. Over the 12-month period, apprentices at Russell Investments will gain valuable exposure to industry while developing essential soft skills and acclimating to a professional corporate environment.

Eligibility

- Should not be registered on EPF/ ESIC Portal
- Should not have completed their education from a foreign university

Apprentices who enroll should have their Aadhaar seeded with their personal mobile number and personal email address. This is a mandate

Role Summary

We are looking for a motivated and detail-oriented Associate AI Project Apprentice/Coordinator to support the delivery of Artificial Intelligence (AI) and Generative AI initiatives across the organization.

This is an excellent opportunity for someone early in their career who is passionate about technology, AI, and project management. The role will involve working with business stakeholders, technology teams, data teams, and vendors to coordinate project activities, track progress, manage documentation, and support successful delivery of AI initiatives.

Key Responsibilities

- Assist in planning and coordinating AI and technology projects.
- Track project milestones, risks, actions, and dependencies.
- Prepare project status reports and presentations for stakeholders.
- Schedule and facilitate project meetings and workshops.
- Coordinate with business and technology teams to gather requirements.
- Maintain project documentation and governance artifacts.
- Support testing, deployment, and change management activities.
- Assist with vendor coordination and follow-up activities.
- Learn and build knowledge of AI, Generative AI, and emerging technologies.

Qualifications

- Bachelor's degree in Engineering, Computer Science, Information Technology, Business, or a related field.
- Strong communication and organizational skills.
- Ability to manage multiple tasks and priorities.
- Proficiency in Microsoft Office (Excel, PowerPoint, Word).
- Interest in Artificial Intelligence, Data Analytics, and emerging technologies.

Preferred Skills

- Familiarity with Agile or Scrum methodologies.
- Exposure to Jira, Azure DevOps, or similar tools.
- Basic understanding of AI, Machine Learning, or Generative AI concepts.
- Certifications such as Scrum Fundamentals, CAPM, or AI Fundamentals are a plus.

3) Graduate Trainee (Apprentice), Global Distribution Operations

Reporting To:

Manager, Client Services

Shift:

EMEA (1:30 pm - 10:30 pm IST) (India)

Apprenticeship is a 12-month program that will provide a comprehensive learning experience, blending theoretical knowledge with on-the-job training. Over the 12-month period, apprentices at Russell Investments will gain valuable exposure to industry while developing essential soft skills and acclimating to a professional corporate environment.

Eligibility

- Should not be self-employed
- Should not be enrolled under other government-funded programs
- Should not be practicing professionally at the time of application
- Should not be registered on EPF/ ESIC Portal
- Should not have completed their education from a foreign university

Apprentices who enroll should have their Aadhaar seeded with their personal mobile number and personal email address. This is a mandate.

Position Summary

The Graduate trainee (apprentice) Client Service Associate (CSA)'s primary responsibilities will be to support various functions within the North America Advisor and Intermediary Solutions business to help achieve the unit's ambitious sales goals. For example, supporting the achievement of growth goals in separately managed accounts; and gaining efficiencies in representing data on our mutual funds, model strategies and separately managed accounts on third party data platforms; and supporting our practice management initiatives designed to help advisors grow their businesses. Through these activities, the CSA assists the sales teams in providing a high-quality service experience to financial advisor clients and end investors.

The successful candidate will have a demonstrated track record of effective collaboration, a "team-first" mindset, a strong work ethic, the organizational skills and flexibility to balance

and prioritize multiple tasks and initiatives concurrently, and a desire to grow their skills and knowledge.

Qualifications

- Bachelor's degree

Responsibilities

- Support the proposal, opening, and maintaining and closing of Personalized Managed Accounts: convert large data sets from PDF to excel format; scrub data; run proposals; coordinate the account opening process and transactions in partnership with the Personalized Managed Accounts Services team; escalate operational, client service and technical issues as necessary
- Other duties as assigned

Candidate Requirements

- Keen interest in global capital markets, the wealth management industry, investment vehicles commonly used by financial advisors (e.g., separately managed accounts, mutual funds, ETFs, model strategies)
- Excellent critical and analytical thinking, attention to detail and written communication skills; ability to follow and proactively improve written procedures.
- Ability to thrive in a team environment while also working independently.
- Excellent time management and organizational skills; ability to manage multiple responsibilities and changing priorities.
- Proficiency in Microsoft suite of products, in particular Excel, Outlook, Word

4) Graduate Trainee (Apprentice), Design Specialist

Reporting To:

Marketing Operations Director

Shift:

EMEA (1:30 pm - 10:30 pm IST) (India)

Apprenticeship is a 12-month program that will provide a comprehensive learning experience, blending theoretical knowledge with on-the-job training. Over the 12-month period, apprentices at Russell Investments will gain valuable exposure to industry while developing essential soft skills and acclimating to a professional corporate environment.

Eligibility

- Should not be self-employed
- Should not be enrolled under other government-funded programs
- Should not be practicing professionally at the time of application
- Should not be registered on EPF/ ESIC Portal
- Should not have completed their education from a foreign university

Apprentices who enroll should have their Aadhaar seeded with their personal mobile number and personal email address. This is a mandate.

About The Role

Are you passionate about design, visual storytelling, and creative problem-solving? Russell Investments is seeking a Graduate Trainee – Junior Designer as part of our Graduate Trainee Program. This role provides an opportunity to work on real-world design projects while learning from experienced creative professionals in a collaborative global environment.

Reporting to the Design Lead, you will support the development of digital and print marketing materials, presentations, infographics, and brand assets. The ideal candidate combines creativity with attention to detail and is excited to grow their skills in branding, visual communication, and design production.

Job Summary

The Graduate Trainee – Junior Designer will support the Brand and Creative Team in developing visually engaging marketing and communication materials across digital and print platforms. This is an entry-level opportunity for a recent graduate looking to build a career in graphic design, branding, and visual communication.

Working closely with the Design Lead and broader marketing team, the Trainee will assist in creating and updating creative assets while learning best practices in brand management, design execution, and stakeholder collaboration.

Responsibilities

- Support the creation and adaptation of marketing and communication materials across digital and print channels.
- Assist in designing presentations, infographics, brochures, social media assets, and other marketing collateral.
- Apply brand guidelines consistently across all creative deliverables.
- Collaborate with designers, marketers, and other stakeholders to translate ideas into visual concepts.
- Assist with image editing, formatting, layout design, and content updates.
- Learn and apply design best practices, typography, and visual storytelling techniques.
- Support multiple projects while maintaining quality and meeting deadlines.
- Stay informed about emerging design trends and creative technologies.

Qualifications

- Bachelor's degree in graphic design, Visual Communication, Multimedia Design, Marketing, or a related field.
- Recent graduate or up to 1 year of relevant experience (including internships).
- Basic proficiency in Adobe Creative Cloud (InDesign, Illustrator, Photoshop).
- Familiarity with Microsoft Office Suite, particularly PowerPoint.
- Understanding of design principles, typography, layout, and visual hierarchy.

- Strong attention to detail and willingness to learn.
- Good communication and collaboration skills.
- Portfolio showcasing academic, internship, freelance, or personal design projects is highly desirable.

Preferred Qualifications

- Exposure to motion graphics, video editing, or digital content creation.
- Familiarity with UX/UI concepts.
- Interest in financial services, marketing, or corporate communications.

Portfolio showcasing academic, personal, or internship work is highly desirable.

5) Graduate Trainee (Apprentice), Junior Marketing Specialist

Reporting To:

Marketing Operations Director

Shift:

APAC (7:00 am - 4:00 pm IST) (India)

About The Role

Are you creative, curious, and eager to build a career in marketing? Russell Investments is seeking a Graduate Trainee – Junior Marketing Specialist as part of our Graduate Trainee Program. This role offers an exciting opportunity to gain hands-on experience supporting a wide range of marketing initiatives while working alongside experienced marketing professionals.

Reporting to the Regional Marketing Operations Lead (APAC) and matrix into the Asso. Director (Marketing APAC), you will contribute fresh ideas, support marketing specialist tasks and projects, and develop practical skills across collateral creation, campaign execution, marketing operations, and project coordination. The ideal candidate is enthusiastic about marketing, detail-oriented, and eager to learn in a fast-paced, collaborative environment.

Job Summary

The Graduate Trainee – Junior Marketing Specialist will support the Channel Marketing, Marketing Specialists and Brand and Creative teams in the creation, maintenance, and delivery of marketing materials. This role provides an excellent opportunity for a recent graduate to develop expertise in marketing production, content execution, brand management, and campaign support.

The trainee will work closely with channel marketing and creative teams to ensure marketing materials are accurate, visually appealing, and aligned with brand standards.

Responsibilities

- Assist in creating and updating marketing collateral including brochures, presentations, flyers, digital assets, and campaign materials.
- Update marketing documents and templates using Microsoft Word, PowerPoint, Excel, PDF tools and in some cases, InDesign.

- Support the creation of charts, infographics, and visual content for marketing initiatives.
- Assist with content formatting, proofreading, and quality assurance reviews.
- Ensure marketing materials comply with brand guidelines and approved templates.
- Support campaign execution and project coordination activities.
- Maintain marketing asset libraries and file management systems.
- Collaborate with internal stakeholders to deliver marketing materials within agreed timelines.
- Learn marketing production processes, tools, and best practices.

Qualifications

- Bachelor's degree in marketing, Communications, Business, or a related field.
- Recent graduate and preferably up to 1 year of internship experience or academic projects.
- Proficiency in Microsoft Office Suite, particularly PowerPoint and Word.
- Basic knowledge of Adobe Creative Cloud (InDesign, Illustrator, Photoshop) or Canva.
- Strong organizational skills and attention to detail.
- Ability to manage multiple assignments and meet deadlines.
- Strong written and verbal communication skills.
- Interest in marketing, branding, and content production.

Preferred Qualifications / Experience / Skills

- Internship experience in marketing, communications, design, or related functions.
- Familiarity with digital marketing and social media platforms.
- Experience using Adobe Express, Canva or similar creative tools.
- Interest in financial services and investment management marketing.

Portfolio showcasing academic, personal, or internship work is highly desirable.

6) Graduate Trainee (Apprentice), Performance & Reporting

Job Description:

Apprenticeship is a 12-month program that will provide a comprehensive learning experience, blending theoretical knowledge with on-the-job training. Over the 12-month period, apprentices at Russell Investments will gain valuable exposure to industry while developing essential soft skills and acclimating to a professional corporate environment.

Eligibility

- Should not be self-employed
- Should not be enrolled under other government-funded programs
- Should not be practicing professionally at the time of application
- Should not be registered on EPF/ ESIC Portal
- Should not have completed their education from a foreign university

Apprentices who enroll should have their Aadhaar seeded with their personal mobile number and personal email address. This is a mandate.

Team Overview:

The Performance & Reporting team is responsible for measuring, analyzing, and reporting investment performance across a range of client portfolios and investment strategies. The team supports institutional and wealth management clients by delivering accurate performance calculations, attribution analysis, client reports, and reconciliation of portfolio data.

Key responsibilities include:

- Calculation and validation of portfolio and benchmark performance returns.
- Analysis of investment performance and identification of performance drivers.
- Production and delivery of periodic client performance reports.
- Data reconciliation across accounting, performance, and reporting platforms.
- Investigation and resolution of performance and data exceptions.
- Support for client inquiries related to performance results and reporting.

- Development of automated reporting solutions, dashboards, and process improvements using data analytics tools.
- Ensuring data integrity, accuracy, and adherence to regulatory and client reporting requirements.
- Assist in investment performance analysis and reporting activities.
- Support data reconciliation and exception investigation processes.
- Help automate manual reporting and operational tasks using Python and other tools.
- Assist in developing dashboards and management reports using Power BI.
- Perform data quality checks and support process improvement initiatives.
- Collaborate with team members on reporting, analytics, and operational projects.

The team operates at the intersection of investment operations, data analytics, and client servicing, requiring strong analytical skills, attention to detail, and a continuous improvement mindset. As part of the team's digital transformation initiatives, there is an increasing focus on leveraging technologies such as Python, SQL, Power BI, and automation tools to enhance operational efficiency and reporting capabilities.

Preferred Educational Background:

- Bachelor's degree in finance, Commerce or a related field.
- Strong academic record with an interest in financial markets and data analytics.

Technical Skills:

- Basic knowledge of Python for data analysis and automation.
- Basic understanding of SQL and database concepts.
- Familiarity with Power BI, Excel, or other data visualization/reporting tools.
- Good analytical and problem-solving skills.
- Comfortable working with large datasets and performing data validation.

Soft Skills:

- Strong attention to detail.
- Good communication and interpersonal skills.

- Willingness to learn and adapt to new technologies and business processes.
- Ability to work independently and as part of a team.
- Strong organizational and time-management skills.
